

DELTAPOLE

DELTAPOLE

Tapered Polygonal Pole & Round Pole

Deltapole is a polygonal or round steel pole manufactured by press break machine and welding machine under a high standard of quality control to assure a high quality product. Finishing is done through painting or galvanizing system.

Deltapole is design with a computer software, combining of plate thickness, pole diameter and number of pole-faces to meet a unity check of allowable strenght, deflection and torque. Deltapole can be designed in a variety of heights up to 42 m.

Deltapole standard design can be used to :

- Street lighting pole (double or single arm) from 6 - 12 m
- Highmast up to 42 m
- Park lighting pole
- Flood lighting pole
- Telecommunication pole from 7 - 12 m
- Radio Antenna
- Cellular antena monopole up to 42 m
- Distributor pole from 7 - 12 m
- High Voltage transmission pole up to 500 KV
- Traffic light pole & traffic sign

Made by

ISO 9001:2008

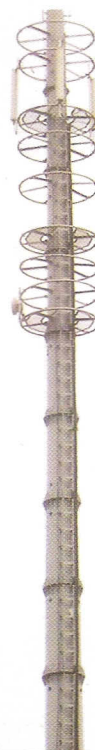

Certificate No : OMSI / 158
